

Introducing CNB e-lysium Stored Value System

*We offer a universally accepted Financial Transaction System
without the necessity of a Traditional Bank Account*

Earnings Potential

Our system allows you to offer your customers a financial card and earn income anytime they use it.

Our System

A real time transaction engine located on a secure server accessible through the Internet and connected to a financial switch which allows access to most financial terminals.

We have solved the three primary issues:

Convenience:

- None of the hassles of setting up a standard bank account
- Money is available 24/7

Cost:

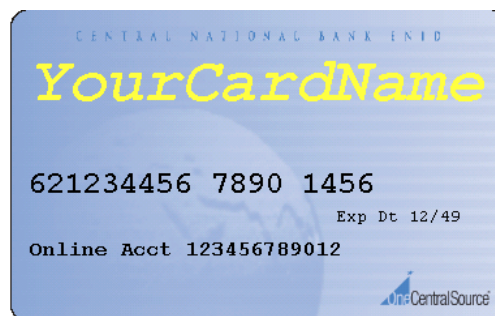

- Eliminate the need for expensive check cashing facilities
- Can reduce the cost of international transfers

Security:

- Uses the most secure industry accepted authentication method
- Customer information protected by a secure server environment
- Daily transactions limits

Your Customer remains Yours

You can provide our System to your customers without making them our customers.

You can design your card and brand it with your own card name.

Your Customer can:

- Make ATM Withdrawals
- Purchase Goods
- Complete International Transfers
- Deposit funds onto the card
- Make long distance calls

Card acceptance

Can be used at over 1 million ATMs and Retail Purchase locations in the U.S. and Internationally at over 810,000 Visa/Plus ATM locations in more than 150 countries.

We offer a complete turnkey solution which includes a financial card, Internet and Phone Banking
